Structure of a COCCON steering committee

- Should we use a similar structure as TCCON or a simplified model?
 - (TCCON: chairs / co-chairs + deputy chairs / site representatives)
 - (flat model: advisory board consisting of all COCCON PIs)
 - (circulating (NDACC-IRWG): regular vote of PIs for selecting chair + co-chairs)
- Should COCCON connect to TCCON and/or NDACC-IRWG more closely?
- Should we connect COCCON in a formal way to, e.g., European Infrastructures (e.g., ICOS) or agencies (e.g., ESA)?
- Would you be willing to take a role in the design of a COCCON SC, and perhaps eventually take a role in this SC? (If so, please let us know)
- Do you have recommendations to be forwarded to ESA?
